

# Welcome to the Yorkshire Wensleydale Cheese Experience

Complete our Cheese Trail to find out what  
makes our cheese so special!

1. Walk through the reception archway and read about our fascinating history here in the Yorkshire Dales.

What year does cheesemaking in the area date back to?

1150

2. Now you're in the Cheesemaking Demonstration Room you'll learn about how cows were milked by hand in the past by farmers sitting on special milking stools.

How many legs did the stool have? .....3.....

3. Having watched our team make Yorkshire Wensleydale Cheese, fill in the missing letters below which spell out a very important and unique ingredient.

Complete the word: S T A R T E R      C U L T U R E

4. As you enter the next building, make your way down the butter making corridor.

How tall were the world's tallest and smallest cows? .....195cm .....61.5cm

6. Whilst learning about butter making, can you see the special triangular butter making churn? Only 21 were ever made in this design!

Which Queen was this special triangular butter making churn made for?

Queen Victoria

5. The milk and cheese are some of the best sources of calcium for your body.

What parts of your body is calcium important for?

Teeth, bones  
.....  
& muscles  
.....

Don't forget to play the truckle roll!

But what is a Truckle?

A cylindrical wheel of cheese from the Latin "trochlea" meaning wheel/pulley

7. Did you know that only Yorkshire Wensleydale can be made in Wensleydale! You can tell it's one of our cheeses by looking for the special PGI logo.

What do the letters PGI stand for? Protected Geographical Indication

8. Don't forget to try some of our delicious cheeses in our 'Taste of Yorkshire' Tasting Room and learn what they perfectly pair with!

How many cheeses can you see on our blackboard? 8

9. Next stop is our Wallace & Gromit area - Don't forget to have your photo taken with them!

Which character can you see in the window of the rocket?

Wendolene Ramsbottom

10. We hope you've enjoyed watching the Wallace & Gromit films and reading learning about Wensleydale's most famous fans! 'A Close Shave' was where we first discovered Wallace's love of Yorkshire Wensleydale cheese.

The film first aired on Christmas Eve, but do you know what year?

1995

11. Whey is the liquid leftover from cheesemaking and it's a really useful product that can be used in so many ways!

Can you name two things that our whey is used for?

Cream to make our Yorkshire Butter, Lactose Solution that goes to an AD plant to create renewable energy, whey powder (used in baby food, sports nutrition, ice cream etc) and water to clean our factory!

Well done for completing the Yorkshire Wensleydale Cheese Trail! You can check your answers on our website: [wensleydale.co.uk/trailanswers](http://wensleydale.co.uk/trailanswers)
